

The diagram shows a stepped roof structure with the following dimensions:

- Horizontal distance from the left edge to the first vertical step: 2000
- Horizontal distance from the first vertical step to the right edge: 3000
- Vertical height of the first step: 2250

A regular hexagon is shown with a side length of 200. A vertical line segment is drawn from the top vertex to the midpoint of the bottom side, representing the height.

A diagram of a triangle with a vertical line segment drawn from the top vertex to the base. The left side of the triangle is labeled 56.57, and the base is labeled 40.
